PROMPT POINTERS

These are the things to keep in mind when we are constructing a prompt.

- ☐ Put your instructions & important information at the start.

- ☐ Be clear and specific.

- ☐ Avoid vague language.

- ☐ Say what **to** do instead of what **not** to do.

- ☐ Try simple first, then get more detailed.

For text models, give an example of the output you want.

Use the model as a prompt-writing tool!

Image models generally work best with more information.
